

## **\*\*AI Engineer – Cloud & Edge Computing\*\***

**Company: XYZ AI Solutions**

**Location: Remote**

**Experience: 2+ years**

**Salary: Competitive**

### **### \*\*Job Description:\*\***

We are seeking a highly motivated **\*\*AI Engineer\*\*** with expertise in **\*\*cloud computing, edge AI, and data science\*\***. You will work on **\*\*AI model development\*\***, research, and engineering solutions.

### **### \*\*Responsibilities:\*\***

- Develop and optimize **\*\*machine learning models\*\*** for cloud and edge environments.
- Implement **\*\*data-driven AI solutions\*\*** using **\*\*deep learning\*\*** and **\*\*cloud frameworks\*\***.
- Conduct **\*\*research in AI model efficiency\*\*** and deployment strategies.
- Work on **\*\*engineering scalable AI applications\*\***.
- Collaborate with cross-functional teams for **\*\*AI-powered product development\*\***.

### **### \*\*Requirements:\*\***

- **\*\*Experience in AI model development, data engineering, and cloud computing\*\***.
- Proficiency in **\*\*Python, TensorFlow, PyTorch, and data science methodologies\*\***.
- Knowledge of **\*\*AI deployment on edge devices\*\***.
- Research background in **\*\*machine learning and optimization techniques\*\***.

### **### \*\*Preferred Qualifications:\*\***

- Contributions to **\*\*AI research papers\*\***.
- Experience with **\*\*real-world AI applications\*\***.
